- E = naturalized Exotic in U.S. in one or more states including Maryland
 E1 = naturalized Exotics which are the most serious threats to natural areas because they are both damaging and invasive
 E2 = naturalized Exotics which are not as readily established, but once established, are very persistent and damaging to native vegetation
 E3 = naturalized Exotics which are not as invasive as the other two groups, but are still potentially harmful
 E* = naturalized Exotic in Maryland, but native in one or more states in U.S.
 E? = present in Maryland but uncertain whether it is naturalized Exotic or Native
 E?* = some subspecies may be Native
 ? = native in adjacent state and may be native in Maryland
 M# = on Maryland Natural Heritage list, the higher the number, the more frequent they are found in Maryland
 M#? = on Maryland Natural Heritage list, evidence suggests it is not native to Maryland
 XT = Extirpated from Maryland
 EN = Endangered in Maryland
 TH = Threatened in Maryland
